user story	expected result	actual result	pass / no pass
1. 4 Persistent data will be stored in one or more files on the local file system			
User Interface			
Have a consistent look among the different screens.			
For each screen, give users the choice to go to the previous screen and the main menu (among any other options you might provide).			
Do not have users deal with where to find the files that hold the persistent data. Instead, the location of these files should be put in a file called "config.txt" that is read at startup			
HIGH As a bidder I need to be able to register so that I can look at items and bid on things	User can click on register and successfully register as a bidder	User can click on register and successfully register as a bidder	
HIGH As a non-profit I need to be able to register as an employee so that I can access the software	User can click on register and successfully register as a non-profit	User can click on register and successfully register as a non-profit
